

PP fibres

Material data sheet

Product description

Material:	Polypropylene plastic fibres
Color:	white
Form:	Cross section: round Length: straight
Dimensions:	d = 0,032 mm, l = 10 mm or as requested
Max application temperature:	80 °C
Density:	0,91 kg / dm ³

Product properties

Electrical conductivity:	non-conductive
Water solubility:	insoluble
Chem. resistance:	excellent

Packaging properties

Lot size:
Bags of 900 g

All technical data are approximate values. They are based on the evaluation of tests from specific samples and should not be construed as a warranty for which Kalenborn assumes any legal liability. Technical changes and errors excepted.
